

Integrating a videoconference system in a university portal

Gregory DENIS

EUNIS 2010

Yves EPELBOIN Agnès PRUVOST

Agenda

- Presentation of EVO
- Our goals:
 - A new tool: EVO-Learning
 - Integration in the portal
- EVO-Learning
- Integration
- Demonstration

The basis: EVO-International

A unique real time collaboration tool, stable and efficient, at worldwide scale.

Why EVO ?

Three main components:

1. The network

2. The collaboration services

3. The client side

Why EVO ?

Most difficulties arise from:

1) The client:

- installation
- configuration problems
- USE

2) Interruptions and/or traffic congestions in the network

Panda: the EVO server

2007

World topology!

NO LIMIT!!

No limits in the number of participants in a meeting! No limits in the number of simultaneous meetings!

Examples:

1250 users for the « LHC Start » in September 2008.

198 users participating in the « All CMS Meeting » in February 2009.

EVO : Application Client

KOALA

The client: the burden

Full Java application

 Compatible with any platform (Windows, MacOS, Linux)

EUNIS 2010

No installation, no update

EVO.CALTECH.EDU

Comparison

Support : EVOSupport@VRVS.org

- System to provide a real time distance learning platform
- Real Time media : Text, Audio, Video, Desktop, Whiteboard, Files, Recordings.
- The system is based on the EVO technologies
- It is adapted to the constraints linked to learning scenarios : Professor / Students

Goals: integration

- Use the portal authentication system to identify the participant into EVO-Learning and EVO-International:
 - Automatic registration into EVO from the university directory
- Forward the user information from the portal to the EVO learning system:
 - Full ID and role
- Retrieve EVO information into the portal:
 - Class and meeting management

Integration

- Both Evo portlets are compatible with ESUP Portal which is a derived version of U-Portal.
- Authentication via Portal in CAS.
 A Shibboleth version will come soon
- User information retrieved via local LDAP

Advantages

- Avoid management of the user registration.
- Manage, Control of the lawful users
- No additional Authentication required to join a virtual class.
- The web interface modules (portlets) will become open source soon

Real Time Distance Learning

Specific EVO Features

New meeting type: Class Room

2 specific user types: Professor and student For each user type:

- Different Abilities
- Different Graphical User Interfaces

Professor (1)

from the Portal

- Create a class room reservation and attach some students to it
- Modify, Duplicate, Cancel a class room
- Add a moderator to the class room
- Protect a class room via a password
- Join any ongoing class room

Professor (2)

in the class room (virtual)

- Send / receive: audio / video
- Broadcast the desktop
- Send files to students
- Allow a student to speak via a dedicated "Raising Hand" widget
- Ban a student from the class room
- Increase the class room duration

Student (1)

from the Portal

- Ongoing Class rooms (can be joined)
 - Public classes (with no list of attendees)
 - Classes in which he/she is attached to (previously by the professor)
- Calendar
 - List of all the class rooms that he/she will be able to join per month

- Calendar view (cells) of the class per month

Student (2)

In the class room (virtual)

- Receive: audio / video
- Receive professor desktop
- Access to files
- Interactive Chat
- Can raise hand, when request is accepted:
 - Send audio, video, desktop to the class room

Send file to the professor

Digital Raising Hand

Students

A simple interface to require to speak

A simple widget to moderate a class

Professor

Allow / Deny Request

EVO-Learning

- Tests with students and teachers validated end of April 2010
- Starts next semester i.e. September 2010

EVO-International

- Opened since September 2009
- 470 users in the UPMC community
- Use for virtual meetings as well as link to "real" videoconference rooms
- Part of the UPMC strategy: increase in the number of rooms as well as in the use of EVO

EVO International

A European Infrastructure?

- EVO-Learning: one university, one server
- For European studies (Tempus...) build a European MonaLisa infrastructure

EUNIS 2010

 Cooperation with National NREN and TERENA?

CHNOI

Yves EPELBOIN Agnès PRUVOST

With a grant from the city of Paris to the universities Paris 2 and UPMC-Paris 6 through UNR Paris IdF

EVO-Learning

10 000 \$

10 000 \$/y

Start: September 2010

- Software + initial installation 15 000\$
- Additional server (more than 100 simultaneous links)
- Portlet installation and fee
- + local Linux server

Contact: Philippe Galvez galvez@caltech.edu

EVO-International

- A Panda server for each university unless agreement through NREN: in France infrastructure supported by RENATER
- Software installation 15 000 \$
- Additional server installation 10 000 \$
- Portlet and connectivity 10 000 \$/y

Contact: Philippe Galvez galvez@caltech.edu
