

# Accelerating Higher Education's Digital Transformation Journey

Susan Grajek

Vice President for Partnerships, Communities, and Research

Betsy Reinitz

Director of Enterprise IT Programs

# Digital Transformation in Higher Education

**Digital transformation (Dx)** is the process of optimizing and transforming the institution's operations, strategic directions, and value proposition through deep and coordinated shifts in culture, workforce, and technology.\*

\*EDUCAUSE definition, adapted from [Getting Ready for Digital Transformation: Change Your Culture, Workforce, and Technology](#)

# The Dx Equation

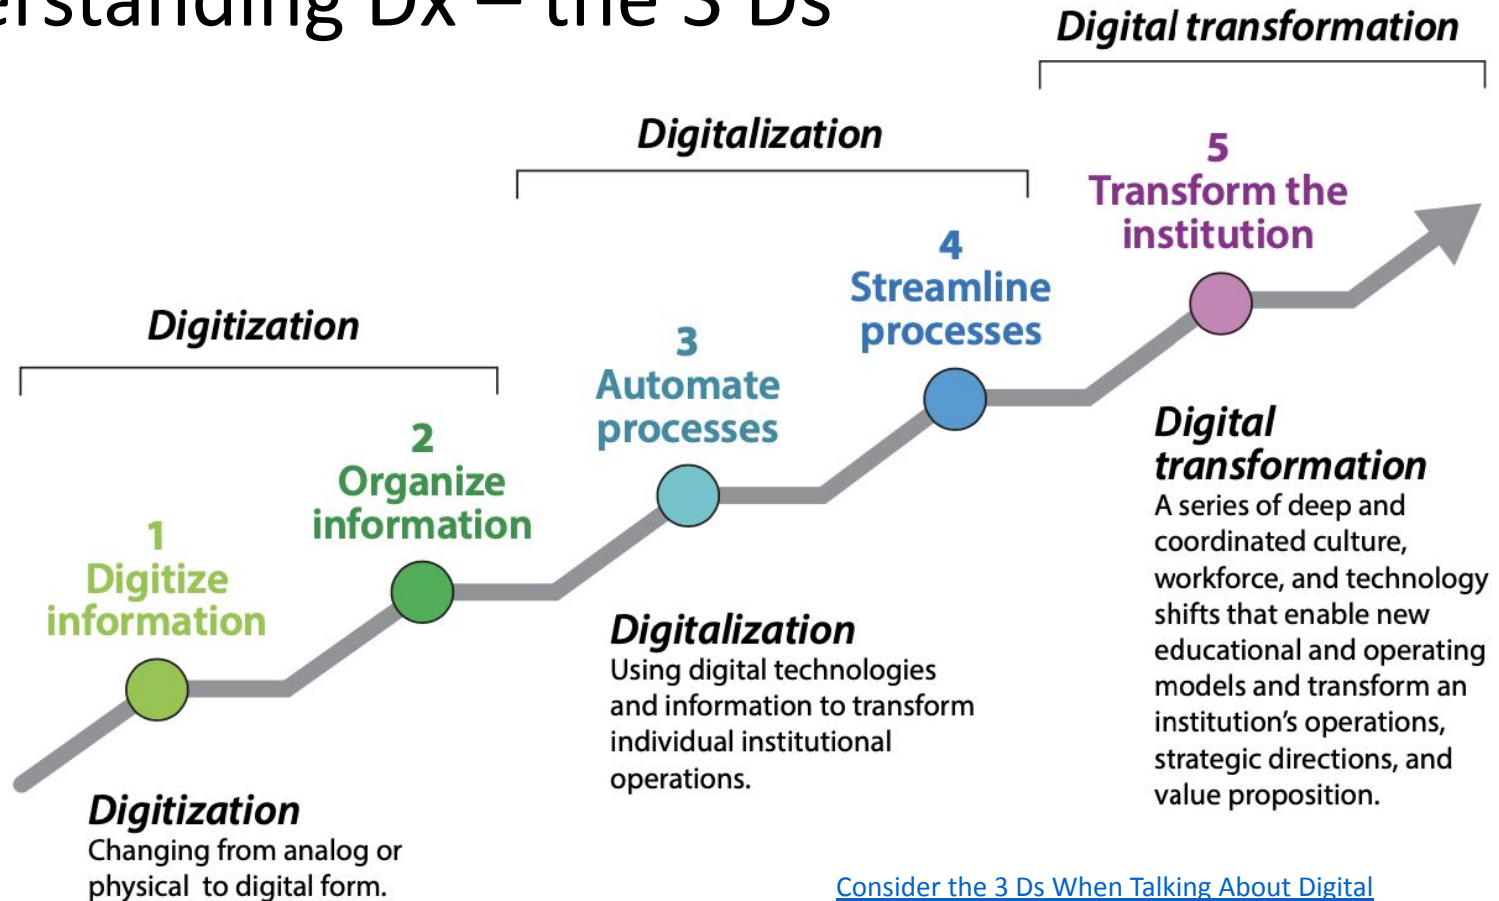

Intentional change in institutional value proposition or direction  
+ Shifts in culture, workforce, and technology  
= Digital Transformation

# It's More Than an “IT Thing”

Digital transformation...

- Relies on institutional leadership to understand and champion the changes
- Builds on the core values of higher education and of the institution
- Involves a foundational shift such as changes to the underlying business model and approach
- Requires changes that are holistic in nature
- Enables an institution to differentiate itself
- Involves continuing effort—it's not a “once and done” solution

# Understanding Dx – the 3 Ds

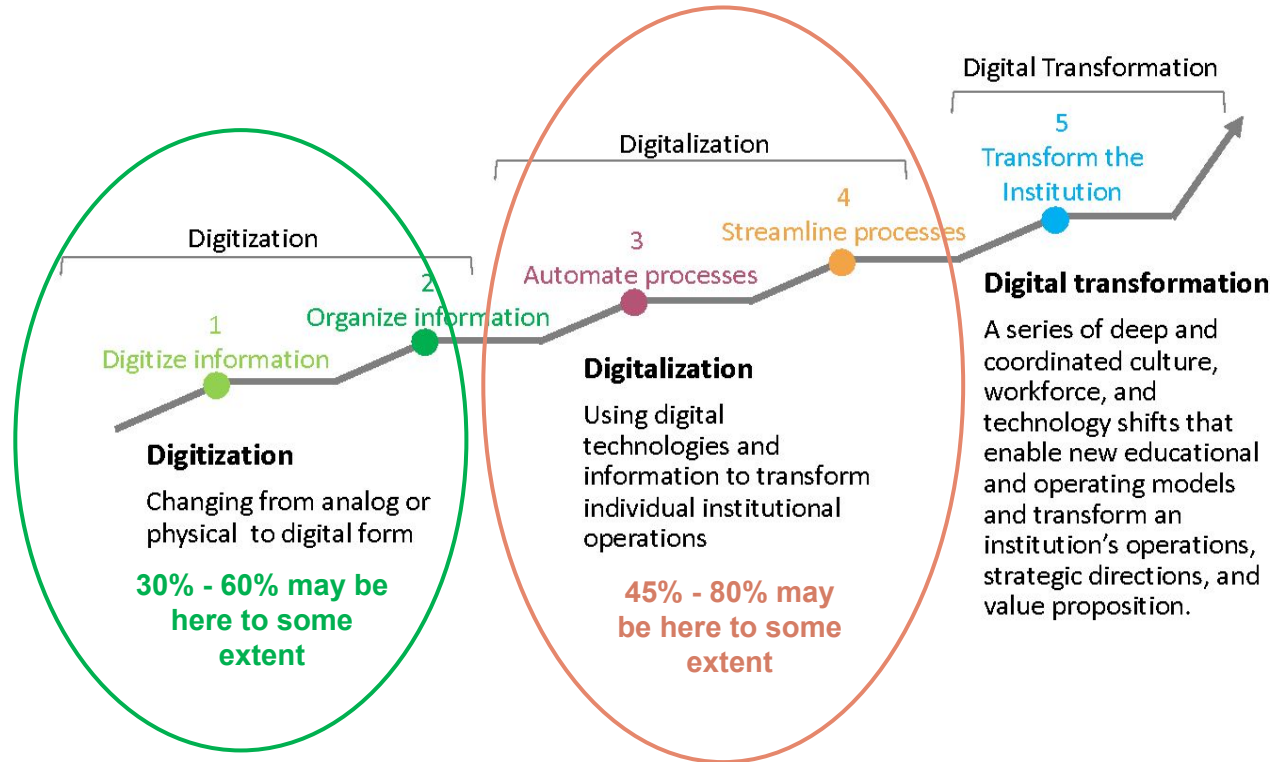

[Consider the 3 Ds When Talking About Digital Transformation](#)

# Most institutions will want to start with Simplification

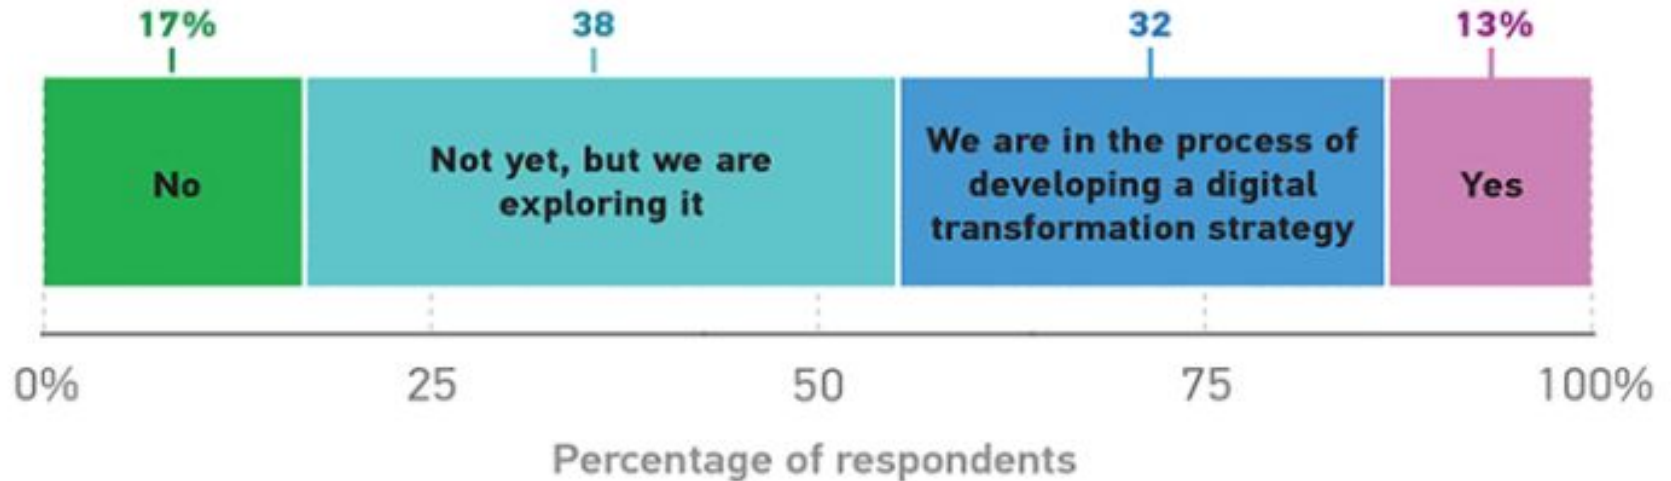

Simplification paves the way for innovation

*“This effort simplified the company’s systems and processes to reduce costs and risks. Without a powerful operational backbone, Philips’ leaders would be consumed with executing and maintaining core processes instead of imaging, developing, and commercialized digital offering that help people live healthier lives.”*

# Level of Institutional Engagement in Dx

# Dx Is Getting More Important

75%

of higher education IT leaders who responded to our Dx survey believe that Dx will become more important in the next two years.

# Grand Challenges for Higher Education

## Student Success

- Persistence, retention, completion
- Engagement
- Outcomes

## Financial Health

- Enrollment
- Costs
- Funding
- Natural disasters

## Reputation and Relevance

- Affordability
- Political climate
- Teaching
- Academic programs
- Research

## External Competition

- Alternative credentials
- Employer-based learning
- Talent
- Global higher education

## COVID-19

- Crisis mitigation
- Health and safety
- Digital transformation

# EDUCAUSE 2021 Top IT Issues

Three Paths for Higher Education's Emergence from the Pandemic

Restore

Evolve

Transform

# RESTORE

# EVOLVE

# TRANSFORM

## #1. Cost Management

Reducing institutional costs and increasing workforce efficiency

## #1. Student Success

Advancing student support services to help students attain academic and career goals

## #1. Institutional Culture

Contributing to a culture of transformation

## #2. Online Learning

Strengthening online and hybrid education

## #2. Equitable Access to Education

Providing technologies, support, and policies for diverse users

## #2. Technology Alignment

Identifying and applying sustainable digital strategies and innovations

## #3. Financial Health

Revising budget models and IT governance

## #3. Online Learning

Progressing from emergency remote teaching to online learning

## #3. Technology Strategy

Developing an enterprise architecture that keeps pace with strategic change

## #4. Affordability & Digital Equity

Providing increased support for students' technology needs and enabling technology availability

## #4. Information Security

Developing a cybersecurity operations strategy

## #4. Enrollment & Recruitment

Exploring and implementing creative holistic recruitment solutions

## #5. Information Security

Providing information security leadership

## #5. Financial Health

Partnering to develop new funding sources

## #5. Cost Management

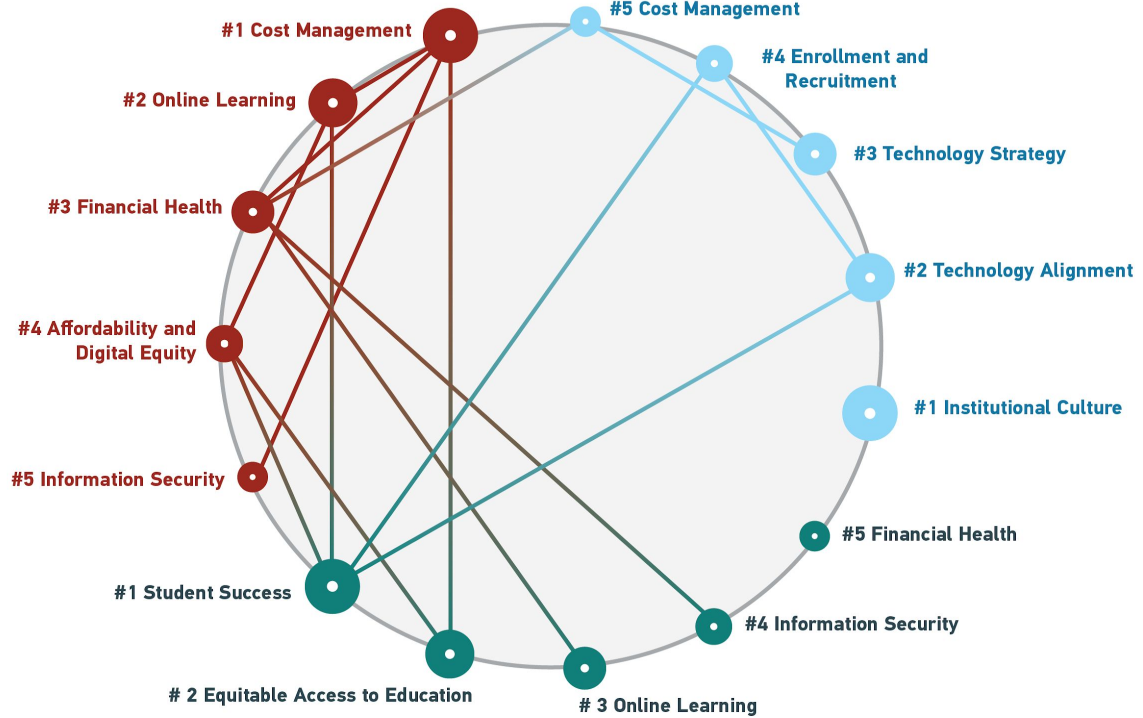

Focusing on digital transformation

“There will never be a return to what we knew as normal”

# The Pandemic and the Acceleration of Dx

Dx is a series of focused journeys

# What kinds of digital transformation journeys might we expect to see?

- Transforming credentials
- Strategic enrollment management
- Programming for lifelong learners
- Curriculum reform
- Student outcomes
- The student experience
- Hybrid learning models
- Teaching and learning innovations
- Alignment with and impact on employers and the local region
- Institutional efficiency
- Addressing social justice issues like equity, the digital divide, racism, mental health, and social discord

# The Dx Journey | A Roadmap

[dx.educause.edu](https://dx.educause.edu)

# The Dx Journey | A Roadmap

**Digital transformation  
is the future of higher  
education.**

But the future doesn't just happen. It's the result of a process—  
one that requires strong leadership and a commitment to  
institutional change to be successful. We're here to help you  
lead your team through the digital transformation (Dx) journey.

# The Dx Journey roadmap at a glance

# Three phases for your Dx Journey

## Your path to Dx starts here.

We take you through the Dx journey in three phases. Using our resources, you'll be able to learn about Dx, create a plan for your institution, and put that plan into action.

### PHASE 1

## Learn

Understand what digital transformation means for higher education and for your institution. We'll start with definitions and identify signs that Dx may already be happening at your institution.

[New to Dx? Start Here.](#)

### PHASE 2

## Plan

Prepare for Dx by assessing your institution's capabilities, setting goals, developing a roadmap, and getting colleagues across campus excited to be part of institutional change.

[Preparing for Dx Initiatives? Start Here.](#)

### PHASE 3

## Do

Put your plans into action by launching strategic initiatives that will make your institution more competitive, flexible, and responsive. Evaluate their impact and adjust course accordingly.

[Ready to Implement? Start Here.](#)

# Start by Learning about Dx

## Resources

- Dx definition
- Major Dx signals
  - How to foster a **culture** that embraces Dx
  - The effect of Dx on the **workforce**
  - How to use **technology** to transform the institution

[dx.educause.edu](https://dx.educause.edu)

EDUCAUSE

DIGITAL  
TRANSFORMATION

## Learn

Understand what digital transformation means for higher education and for your institution. We'll start with definitions and identify signs that Dx may already be happening at your institution.

## The Basics

Start here. We guide you through the fundamentals of digital transformation. Learn about the why behind Dx and the three key areas where shifts must happen for an institution to transform.

WE'LL COVER THESE STEPS:

## Your Institution

In this section we turn the attention to your institution. Reflect on your institution's readiness and overall progress in the areas of culture, workforce, and technology. We provide the materials you'll need to share this discussion with other campus leaders.

WE'LL COVER THESE STEPS:

# Then begin Planning your Dx journey

## Resources

- Dx Maturity Assessment and advice
- Online Dx workshops

[dx.educause.edu](https://dx.educause.edu)

EDUCAUSE

DIGITAL  
TRANSFORMATION

## Plan

Prepare for Dx by assessing your institution's capabilities, setting goals, developing a roadmap, and getting colleagues across campus excited to be part of institutional change.

## Resources

### Maturity Assessment

Use this resource to understand your institution's Dx capabilities and identify areas to focus on. The assessment is designed for CIOs, IT leaders, or other campus leaders, such as your CAO or CBO, to fill out with input from stakeholders across campus.

[TAKE THE MATURITY ASSESSMENT](#)

### Professional Development

Participate in our online workshops to learn and exchange ideas with colleagues from campuses around the country working on Dx. Sign up for our Dx newsletter to be notified of upcoming events.

# Preview: Six Steps for Designing your Dx Strategy

EDUCAUSE

DIGITAL  
TRANSFORMATION

# Six Steps for Designing your Dx Strategy

## Purpose

Step 1: Define the **Purpose**. Why are you engaging in Dx? What institutional goal, challenge, or need are you addressing?

---

## Context

Step 2: Identify the **Context** that is fueling this need to change

---

## Impact

Step 3: Describe the **Impact** in terms of the anticipated change to the institutional value proposition. How does it address the **Purpose**?

---

## Outcomes

Step 4: Describe the **Outcomes**. What will change in the next 6 months? In the next 1-3 years?

---

## Outputs

Step 5: Describe the **Outputs**. What will you implement, and what shifts will be needed in culture, workforce, and technology?

---

## Inputs

Step 6: List the **Inputs**, including resources needed and Dx Signals that you will rely on or build

# Dx Strategy-on-a-Page, part 1

**Purpose**

**Context**

**Impact**

**Change to Value Proposition**

**Connection to Mission/Goals**

**Outcomes**

**Short Term**

**Long Term**

**Evidence**

## Dx Strategy-on-a-Page, part 2

### Outputs

**Project/Initiative Objective**

**Culture Shifts**

**Workforce Shifts**

**Technology Shifts**

### Inputs

**Dx Signals You Will Rely On**

**Dx Signals to Be Improved**

**Resources Needed**

# Dx Strategy Example: Aligning IT with Institutional Mission to Support Innovation, part 1

**Purpose:** As part of an institutional effort to align all departments with institutional strategy and goals, IT will create a multi-year IT transformation plan.

**Context:** Increasing pressure to attract and retain students | New focus on areas of institutional differentiation | Decreased revenue leading to need for more financial and operational efficiencies | Need for ability to make quicker adjustments based on changing situations

## Impact

### Change to Value Proposition

Having a clearer focus on shared goals will allow the institution to focus efforts on innovation in areas that differentiate it. This sharper focus on what differentiates the institution will also create a clearer choice for students looking for an education in our particular areas of expertise.

### Connection to Mission/Goals

By directly aligning IT priorities with institutional goals, IT will be better positioned to support and adapt to changes brought about by this change to value proposition.

## Outcomes

### Short Term

- Better understanding within IT of institutional strategic goals and priorities and primary drivers and levers of change
- Review of existing IT projects and decision-making processes
- Review of IT governance structure analyzed

### Long Term

- Overhaul of IT governance structure if necessary
- Development of stronger IT business liaison structure for better understanding of campus needs
- Development of more strategic relationships across the institution

### Evidence

- Better stakeholder buy-in through better change management
- More transparency of decision-making
- Decrease in time spent on IT projects without a direct connection to an institutional goal

# Dx Strategy Example: Aligning IT with Institutional Mission to Support Innovation, part 1

## Outputs

### Project/Initiative Objective

Develop a multi-year IT transformation plan that highlights connections between IT projects and initiatives and specific institutional goals.

### Culture Shifts

- Cross institutional collaboration in planning IT work
- Overcoming fear that changes will lead to job loss
- Better transparency across the institution for how IT decisions are made, with more stakeholder contributions into the process

### Workforce Shifts

- May lead to shifts in the types of position needed if we determine that some work under way now does not need to continue
- Increase in business liaison competencies
- Increase in communication skills among IT staff
- Greater focus on vendor negotiation and management and less on technology management

### Technology Shifts

- Project management tools may be needed

## Inputs

### Dx Signals You Will Rely On

- Academic curriculum redefined to better serve student needs
- Leaders willing to adopt new strategic directions
- Adept at change management

### Dx Signals to Be Improved

- Focus toward institution-wide goals and away from siloed goals
- Focus on institutional differentiation
- IT investments and initiatives fully aligned with institutional priorities through governance
- Emergence of new levels of cross-organizational alignment and collaboration
- Investments and technology implementations specific to Dx projects informed by user experience

### Resources Needed

- Campus leadership time to engage in the project
- IT staff time to engage with new ideas and learn new skills
- New collaboration and knowledge management software

# Summary

1. Digital transformation is a series of focused journeys, not a destination
2. Dx is about more than technology, and it must have an objective of transforming the institution itself
3. A lot of initial Dx work centers on preparing existing infrastructure and culture for transformation
4. We reviewed a framework to help institutional leaders plan a Dx initiative at their institutions
5. Dx is happening faster, and is more important, since the pandemic
6. EDUCAUSE has Dx resources at [dx.educause.edu](https://dx.educause.edu)
