

Creating a One-Stop Shop EMA (Electronic Management of Assessment) Solution Within Canvas

Gareth Kirk and Paul Towers

What we had before Canvas

- Assessments were automatically built and synced
- Deeply integrated with our Student Management System
- Grades were entered and synced to SITs
- Not linked to Assessment policy/process
- Inconsistent use

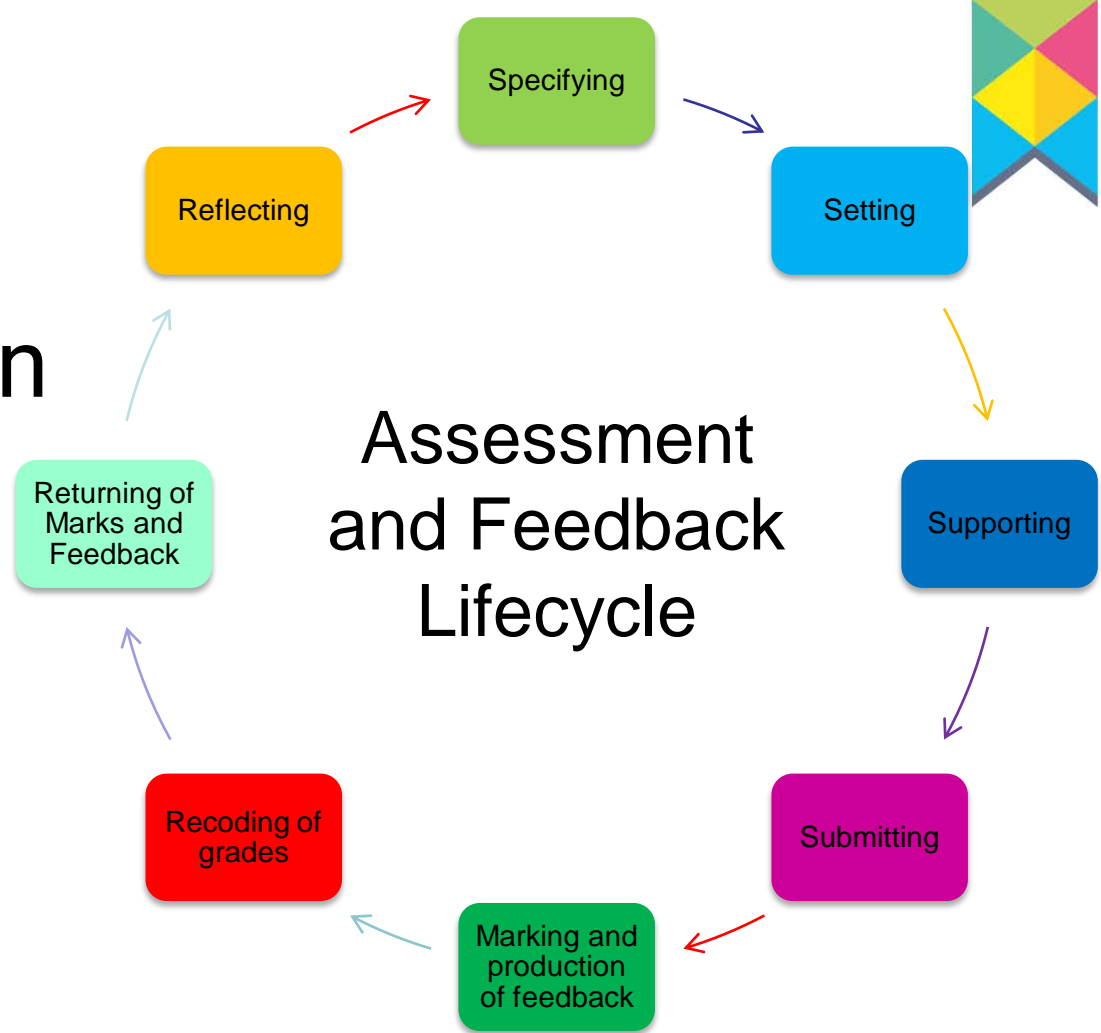

Vision – Full EMA

- One stop shop for Assessment
- Standardised and Automated (where possible) our assessment processes.
- 'Single source of truth' for Assessments.
- Transparent process for staff and students regarding Assessment
- Enabling our organisation policies for assessment
- Staff time saving
- Still utilising the key functionality of Canvas – Speedgrader, etc

EMA at Wolverhampton

- Adapted from the JISC Assessment and Feedback Lifecycle. The University used the same framework to build the Assessment Centre process.
- JISC – Provides Digital Solutions for UK education and research

Challenges (pre launch)

- What are Assessment Processes?
- Was our Data good enough?
- How long would this take?
- Is this just a data integration?
- What about the Pandemic?

Challenges (after launch)

- Not many technical issues
- Inconsistent marking practices have come to light
- Change is always difficult

What Next

- Further advancements
 - Moderation
 - Marking Teams
 - Academic Misconduct
- Review and Enhance potential future functionality
- Enhanced Reporting and monitoring of Assessment process
