EUNIS

EUROPEAN UNIVERSITY
INFORMATION SYSTEMS

Project in brief

Overall aim: building a European student eID scheme for higher education.

- Allow mobile students to safely and seamlessly identify and authenticate themselves using their student credentials.

Benefits:

- Cross-border authentication for higher education students.
- Access to online services through single log-in.
- Reinforced European student status.

Deliverables, results:

- Integration of eduGAIN and the European Student Identifier (ESC).
- Integration of eduGAIN and eIDAS.
- Integration of the European student eID by...
 - Erasmus+ Mobile App, Online Learning Agreement, Erasmus Dashboard, Online Learning Agreement and the PhD Hub.

Connections to other projects

- eduGAIN
- eIDAS
- European Student Card Project
- European Student Card Initiative
- Erasmus+ Digital tools
 - Erasmus+ Mobile App, Erasmus Dashboard, Online Learning Agreement
- OpenU
- PhD hub
- EstudantelD

Integration Issues

Integration of European Student Identifier into the eduGAIN network

- As a standard attribute that HEIs can send through eduGAIN

Integration of eIDAS into eduGAIN

- Rollout of eIDAS-enabled student registration at the level of HEIs and take-up
- eIDAS rollout among Member States
